

TIME FOR A GENERATION CHANGE

S3000 passes the baton to the microScan3

Safety laser scanner

SICK
Sensor Intelligence.

Another chapter in the success story

After many years of successful use in countless industries, the S3000 safety laser scanner is now handing over the baton to its successor, the microScan3.

The decades of experience and the knowledge gained in that time have been used to develop the new generation of safety laser scanners from SICK. With the microScan3, you can benefit from the combination of safety expertise and innovative strength both now and in the future.

microScan3: Innovative strength for your applications of today and tomorrow

The microScan3 safety laser scanner masters challenges such as ambient light, dust and dirt as well as large scanning ranges up to 9 m thanks to the safeHDDM® scanning technology. With smart connection technology, intuitive operation, 275° scanning angle, rugged design, and customizable adjustment options, you are ideally equipped for the future of your applications.

microScan3: New generation. Expanded options. Future proofed.

Increased productivity

Prevent machine downtime thanks to the new, innovative safeHDDM® scanning technology. Remote diagnostic options and precise measurement data ensure optimized processes.

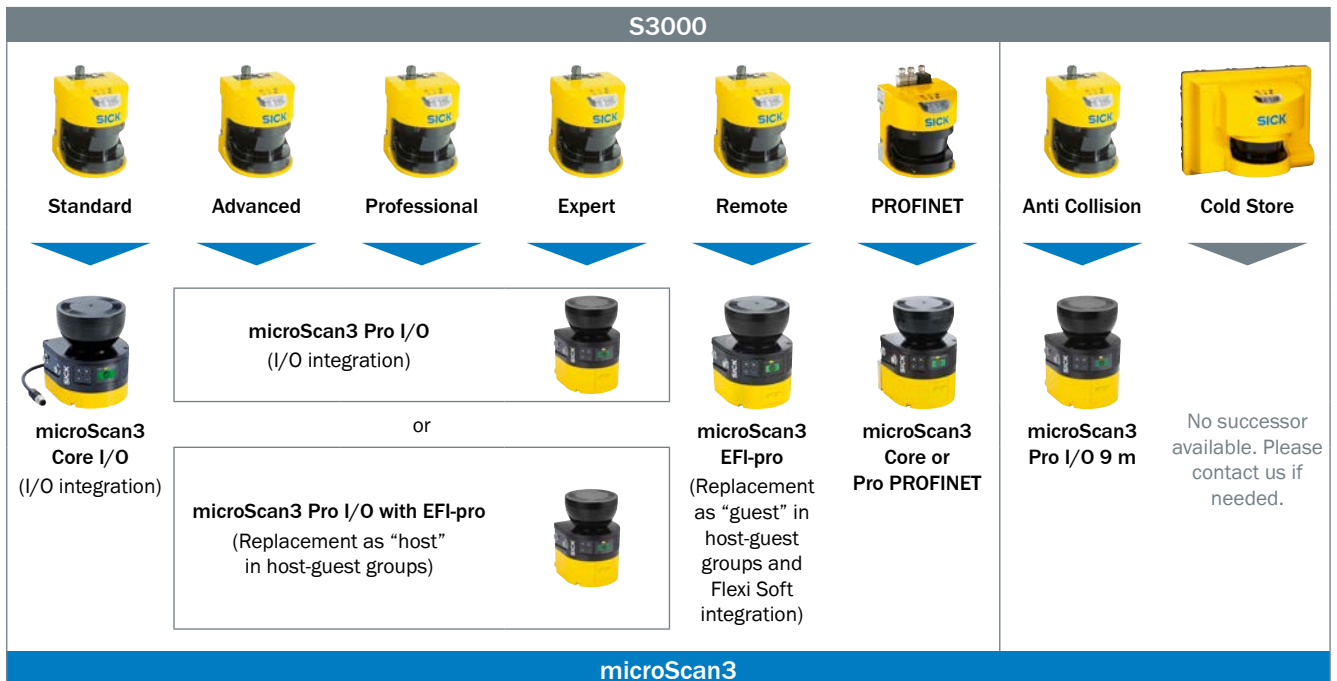

More flexibility

With up to 128 configurable fields and monitoring cases, you can flexibly adjust the sensor settings to the current requirements. Thanks to the simultaneous evaluation of up to 8 protective fields, you have even more options for your application.

Future proof

No matter if you have the I/O interface or network variant – integration of the microScan3 can be tailored precisely to your needs. Prepare your application for the future: With countless functions for creating intelligent safety concepts and automation solutions.

The right successor for your application

Thanks to the different variants, the microScan3 has the right successor product for your application. The smaller size, standardized communication interfaces and extensive accessories make changing to the microScan3 easy.

You are using the S3000 and are looking for the right successor product? Then visit us at www.sick.com/microScan3 or get in touch with us. We would be happy to help you find the right microScan3.
